## *Professional Summary*

Full-Stack Software Developer, including Both Front and Backend Development. Recently earned my certification from UCLA Extension, while also obtaining my Associates Degree in Business Administration at Mt.Sac. From previous work experience, I enjoy working as a team in fast paced environments and managing time to meet required deadlines. While working on projects I like to first understand what my assignment is and what kind of audience I am going to be targeting to make sure their experience using our app or website is amazing. I have learned a lot these past few months and loved it but I can't wait to see what else is in store for me and to use what I have learned to help improve and better the web.

## *Skills*

- Front-End Skills: HTML, CSS
- Back-End and Database Skills
- Analytical Thinking
- Responsive Web Design
- Javascript Libraries and Frameworks
- MVC Architecture
- HTTP Server Configuration
- Teamwork and Collaboration
- Search Engine Optimization
